

**Technical Requirements For Using Wireless LAN
Kongress Palais Stadthalle Kassel
19th DNUG Conference, November 4/5, 2003**

PC System Requirements For Wireless LAN Connections Using Bridges

- Computer with properly installed network adapter
- CAT 5 network cable
- Permissions to set up DNS and DHCP

Note: If the user has not been granted the needed permissions, the DNS and DHCP settings must already be made.

PC/Notebook System Requirements For Wireless LAN Connections Using PCMCIA WLAN Cards

- Computer with built-in PCI card for installing a PCMCIA card
- Notebook with free PCMCIA slot
- Permissions to set up new hardware and drivers
- Permissions to set up DNS and DHCP

Note: If the user has not been granted the needed permissions, a PCMCIA WLAN card must already be installed, and the DNS and DHCP settings must already be made.

IMPORTANT NOTES:

1. Every exhibitor must satisfy the needed system requirements for his/her own computer/notebook at his/her own responsibility.
2. It is possible to use own WLAN cards at the Kongress Palais Kassel.
3. WLAN cards can be lent to exhibitors without own ones against signature. The return will be confirmed by signature, too.

If an exhibitor does not return or returns a damaged WLAN card, he/she will be charged € 180,00.
